

THERE ARE SOME TRIPS YOU DON'T WANT TO TAKE...

RugLock is here to make sure your household rugs are no longer at risk of sending you on one of those trips. RugLock is a spray-on solution that does what rug pads, tape and traditional adhesives cannot do, by creating a permanent non-slip rug backing that grips to all floors in your home without damaging surfaces. Applied rugs can be easily peeled up to reposition or clean. RugLock is great for additional uses as well. Try it on stair runners, placemats, kitchen chair cushions, tablecloths, pet beds, car mats, shoe insoles and more.

RUGLOCK HOLDS FIRMLY TO:
HARDWOOD • VINYL • TILE • CARPET

**A PERMANENT SOLUTION TO
STOP RUGS FROM SLIPPING**

THE BENEFITS

**NON-TOXIC
LOW ODOR**

With 0.0 g/mL VOCs (Volatile Organic Compounds), RugLock is a non-toxic, water-based formula, so it's safe to use inside your home and doesn't have a harsh odor.

**NO DAMAGE
TO FLOOR**

Worried about damage to your hardwood floors? Don't be. RugLock has no harmful chemicals, so it won't ruin your floors. If RugLock transfers to the floor, it can be rubbed off by hand or with a damp cloth, leaving no sticky residue.

**EASY TO
USE**

Applying RugLock is as easy as 1-2-3, or in our case, Prep, Spray and Lock. Unlike other methods, there's no need to cut for size, so you only use what you need, eliminating wasted product.

HOW TO APPLY

STEP 1: PREP

Place rug upside down on a dropcloth, leaving plenty of room along edges. Remove all lint and dirt from back of rug to ensure effective bond. Use painter's tape along the edges to protect the front from overspray.

STEP 2: SPRAY

Shake can well. Gently snap off safety tab. Hold can at knee height (approximately 18-20 inches). Spray from left to right in a sweeping motion. Product should fall onto rug back like snow, ensuring even and full coverage. Let rug dry completely indoors, for 8-12 hours.

STEP 3: LOCK

Remove tape from edges, and place rug as desired on clean surface. Apply pressure to lock the rug in place.

REVIEWS

" We applied RugLock to three rugs in our home. Let me say that it works very well! Works on hardwood, tile and laminate. When we get new rugs I will purchase this product again for sure.

" Well worth the cost. I used it on a runner in front of the couch, an entry way rug, a 12ft braided runner down the hallway and a large area rug. Best thing ever to make rugs slip-free.

" This is an awesome product! I am amazed at just how well it does work! The fumes from this product are minimal. Yep, I am a fan!

" I have tried every type of non-slip pad, tape, etc. None have worked - only helped or left a residue. Frustrated I decided to give RugLock a try. It is fantastic. I have nothing but good things to say about it.
